CLOUD OFFICE SECURITY

In 2025, **on top of native protection** in Microsoft 365 and Google Workspace, ESET Cloud Office Security detected and blocked threats that other solutions missed. It provides an extra layer of defense against sophisticated and evasive attacks.

ESET Incident Report

Incident ID - 08976654

Incident created: January 7, 2025
Incident created: January 7, 2025

Timeline

Incident Timeline provides a clear chronological overview of all key events and actions taken during the incident, helping to understand its progression and impact.

14/07/2025 11:48 **Detection: Set File as Hidden [M0304] – HIGH severity**
MITRE ATT&CK:

Incident summary

On 8 April 2025, an attempt to access the corporate server via API was detected. The incident involved the use of compromised login credentials from an external environment. The attacker attempted to execute unknown binaries via PowerShell. ESET PROTECT automatically blocked the executions and isolated 12 devices from the internal network.

High Severity Incident

Incident Name	API Source Test – Unauthorized Access Attempt
Incident ID	INC-2025-000234
Author	Apollo Connect (SOC Analyst)
Status	Open – monitoring in progress
Created time	08/04/2025, 10:14 UTC
Closed time	Pending
Response	Incident detected and isolated within 2 hours. Expected resolution within 24 hours.
Affected hosts & identities	12 Hosts 5 Identities
Tags	<input type="text" value="Default tag"/> <input type="text" value="Default tag"/> <input type="text" value="Default tag"/>

Computer list

List of all affected computers with basic identification and protection status.

Name	Parent group	OS name	Protection status
eset-apollo-wks-1	Workstations – HQ	Windows 11 Pro	Isolated
eset-apollo-wks-1	Workstations – HQ	Windows 11 Pro	Isolated

Recommended steps

Below is a summary of the recommended actions to contain the current incident and reduce the risk of similar attacks in the future.

- 1. Apply security patches on all affected servers and endpoints**
 - a. Verify patch applicability for Windows 10/11 endpoints (KBXXXXXXX).
 - b. Patch affected servers with the latest cumulative updates.
 - c. Reboot all systems to complete patch installation.
 - Benefit: Closes vulnerabilities used in the attack.
 - Risk if skipped: Attackers can re-exploit known flaws.

- 2. Block all malicious IPs, domains, and hashes identified during this incident**
 - a. Block IP ranges 116.83.1.29 and 121.93.44.121 at the network perimeter.
 - b. Blacklist all malicious domains in ESET LiveGuard Cloud Reputation (appendix B).
 - c. Add malicious file hashes to endpoint blocklists.
 - Benefit: Stops C2 traffic and lateral movement.
 - Risk if skipped: Attackers may maintain persistence and exfiltrate data.

- 3. Reset passwords and invalidate tokens for all compromised accounts**
 - a. Force password reset for all accounts flagged in this incident (see Appendix C).
 - b. For domain accounts: perform KRBGT account reset twice, waiting 10 hours between resets.
 - Benefit: Cuts off adversary access.
 - Risk if skipped: Stolen credentials will remain usable.

De Educatie sector verdient MDR, maar het niveau is vaak nog “antivirus”

- ➔ Aanvallers gebruiken al lang geen virussen meer
- ➔ Aanvallers gedragen zich als beheerders in het netwerk
- ➔ Aanvallers gebruiken vaak een gelect (beheer)account en doen zich voor als “Henk de admin”
- ➔ Aanvallers kiezen graag een moment dat er weinig aandacht is voor hun verkenningssessie (Reconnessaince) als “Henk de admin”
- ➔ Het gijzelen van het netwerk (Ransomware) is vaak pas de allerlaatste stap
- ➔ Wat daaraan vooraf ging is het enige waar je een aanvaller had kunnen onderscheppen
- ➔ Sommige aanvallers kiezen niet alleen voor een gijzeling van data die tegen betaling teruggekocht kan worden
- ➔ Gevoelige gegevens worden ook gebruikt voor afpersing tegen een datalek

Managed Detection & Response 24/7 – 365 dagen binnen 6 minuten

- Wij zijn wakker
- Wij zijn alert
- Wij acteren zo snel mogelijk in de eerste stappen van de aanval (Reconnessaince)
- Wij hebben de mogelijkheid om "Henk de admin" zijn account te pauzeren/disablen op alle portalen
- Wij hebben de mogelijkheid om de computers, server of systemen te isoleren van het netwerk
- Wij werken graag samen met partners/klanten in het gezamenlijk optreden tijdens een incident
- Wij werken samen om de omgeving weerbaar te maken met beveiligingsadviezen
- ESET is internationaal betrokken bij het verdedigen van klanten binnen iedere sector (ook defensie)
- ESET levert ook dreigingsinformatie op statelijk niveau voor de verdediging tijdens conflicten
